

# Selecting a Dynamic View Definition

## Important

The default DVD will be displayed as an option in the Dynamic Viewer/Streaming Viewer, along with any other configured DVDs for the context item type. If alternate DVDs are created, and the user no longer wants the default displayed, the default DVD must be removed by the root user.

To use a configured Dynamic View Definition (see Section Customizing the Tree Grid View Definition), select from the available choices when selecting (left click) the Dynamic View icon in the sidebar.

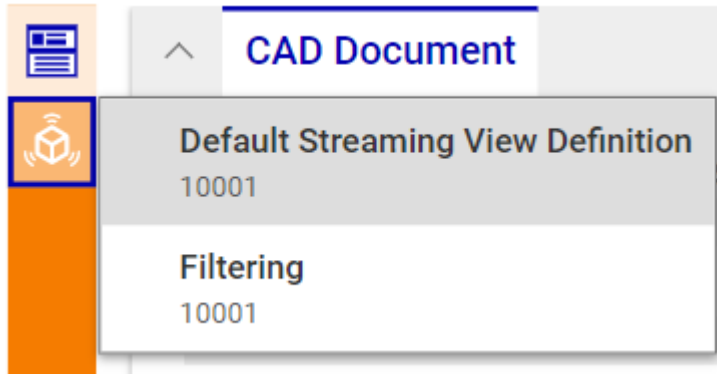

The Dynamic Definition for Dynamic **Viewer** appears as follows:

The screenshot shows the Aras Innovator web application interface. The left sidebar contains a 'Contents' menu with various options like Administration, Configuration, and Content Modeling. The main area displays the 'Dynamic View Definition' configuration for a 'CAD Document'. The configuration includes fields for Document Number, Revision, State, Assigned Creator, Designated User, From Template, and a list of checkboxes for 'Changes Pending', 'Standard', 'Template', and 'Dynamic Enabled'. A 'Native File' field is set to 'Aras\_Cube\_27.S...'. Below the configuration is a 'Structure' tab with a table of 'CAD Documents'.

Seque...	Document Nu...	Revi...	Name	Type	State	Native File [...]	Viewable File [...]	Authoring Tool	Dependency
128	Sample-00011	A	Part-Sample-00011	Mechanical/Part	In Work	Aras_Cube_1_...			
256	Sample-00011	A	Part-Sample-00011	Mechanical/Part	In Work	Aras_Cube_1_...			
384	Sample-00012	A	Part-Sample-00012	Mechanical/Part	In Work	Aras_Cube_1_...			

The Dynamic View Definition for Streaming Viewer appears as follows:

If there is a Dynamic View Definition that is currently in use, it will be highlighted.
