

Aras Dashboards Introduction

Aras Dashboards Overview

Aras Dashboards contain Interactive Widgets to monitor and analyze data within Aras Innovator. Users can customize the widgets to adjust visual settings. Users can configure **Dashboard Settings**, **View Dashboard** content, and edit **Widget Settings** from a **Dashboard Item**.

Dashboard Permissions

Dashboard permissions allow Users to access, view, and modify Dashboard content. The default permissions for Aras Dashboards include three group identities, such as **Dashboard Authors**, **Dashboard Administrators**, and **Dashboard Viewers**.

The screenshot shows the 'Access' tab in the Aras Dashboards interface. It features a toolbar with icons for adding, editing, deleting, and searching, along with a 'Hidden' filter and view options. Below the toolbar is a table listing permissions for four identities: Dashboard Authors, Dashboard Administrators, Dashboard Viewers, and Creator. The table columns are Name, Get, Update, Delete, Can Discover, Show Perm..., and Can change access.

Name	Get	Update	Delete	Can Discover	Show Perm...	Can change access
Dashboard Authors	☒	☐	☐	☒	☐	☐
Dashboard Administrators	☒	☒	☒	☒	☐	☒
Dashboard Viewers	☒	☐	☐	☒	☐	☐
Creator	☒	☒	☒	☒	☐	☒

Dashboard Authors

Dashboard Authors can view and create Dashboards. However, **Dashboard Authors** can only edit, change permissions and delete Dashboards they create. **Dashboard Authors** can only view widget templates. **Dashboard Administrators** can create and edit **Widget Templates**.

Dashboard Administrators

Dashboard Administrators can configure all Dashboard Features, as well as create, edit, and delete Dashboards and Interactive Widgets. **Dashboard User** permissions are managed by **Dashboard Administrators**.

Dashboard Viewers

Sharing Dashboards with Identities using the Roles feature empowers Dashboard creators to manage access and collaboration by assigning specific roles to selected identities. This ensures controlled access and that the right audience receives the intended insights.

Key highlights:

- **Granular Access Control:** Creators can assign roles (EDITOR or VIEWER) to specific identities, tailoring permissions based on the needs of each user.
 - **EDITOR:** Full access to update, modify, and share the Dashboard, without changing the original creator's ownership.
 - **VIEWER:** View-only access to execute and analyze the Dashboard, without the ability to modify.
- **Flexible Role Management:**
 - Easy UI to select identities, assign roles, and review the sharing list with assigned permissions.
 - Built-in relationships for managing shared identities through "Dashboard IdentityShare," enabling seamless tracking and management.
- **Automated Team Creation:** When sharing begins, two internal roles are automatically generated:
 - Dashboard Full Access Sharing for editors.
 - Report Read Only Sharing for viewers.

Important

Users without these three identities do not have access to Dashboards, unless the permissions are customized, or a specific Dashboard has a private permission that overrides the default permission model.

Sharing Dashboards using Role based permissions

The Sharing Dashboards with Identities using Roles feature empowers Dashboard creators to manage access and collaboration by assigning specific roles to selected identities. This ensures

controlled access and that the right audience receives the intended insights.

A Dashboard can be shared to specific identities providing two different roles:

- **Editor:** correspond to the Full Access Sharing. By assigning this role the identities will be able to update, change sharing and delete the Dashboard.
- **Viewer:** corresponding to the Read Only Sharing By assigning this role the identities will be only able to discover and open Dashboard in View mode only.

Easy UI to select identities, assign roles, and review the sharing list with assigned permissions.

Shared With

Identities ▼ ☆

|

 Hidden ▼ |
 ▼
 ▼
 ▼

Name	Role
Dashboard Administrators	Editor
Administrators	Viewer ▼ Editor ▲ ● ▼ Viewer ▼

In case an identity is assigned to multiple roles as part of different identities sets it will get the higher role rights.

Important

Dashboard Sharing uses Aras Innovator Team permissions. Teams are created and deleted when sharing is configured or updated. These system Teams must not be edited or deleted manually.

View Dashboard

The following steps outline the process of accessing Dashboards:

1. From the **Table of Contents**, expand **My Innovator** and select **Dashboards**.

The **Dashboard Table of Contents** appears.

2. Click **Search Dashboards**. The **Dashboards** grid appears.

Dashboards

Search **Clear** Simple **Default**

Name	Columns	Description [...]

3. Enter the **Name** of the **Dashboard** and click **Search**. The **Dashboard** appears in a new row.

Dashboards

Search **Clear** Simple **Default**

Name	Columns	Description [...]
Engineering Dashboard		
Engineering Dashboard	24	

4. Double-click the **Dashboard**. The **Dashboard** form appears.

Delete Dashboard

The following steps outline the process to delete a **Dashboard**:

1. Open a **Dashboard**.
2. Click **Edit**.
3. Click **More** and expand **Delete**.
4. Click **Delete**.

5. The **Confirm Delete** dialog box appears.

6. Click **Delete**.

Interactive Widgets

Interactive Widget Templates

An **Interactive Widget Template** provides details such as widget name, label, type, and icon. The **Widget Templates** define the properties that control a widget's content and behavior. A **Dashboard User** can enter these properties manually or a **Dashboard Administrator** can predefine them.

Interactive Widget Types

Interactive Widget Types determine the appearance and functionality of an **Interactive Widget**. The following three **Widget Types** which can be used are:

- **Grid Widget Type:** The Grid Widget displays search results within Aras Innovator. It is used to display data from the ItemType with related Items.

 OK  Cancel

4. Select a **Widget Template** and click **OK**. The Widget form appears.

- 5. Click **Edit** to configure the **Widget Settings** which populates data on the **Interactive Widget**.
- 6. Click **Done** to save the **Widget Settings**.

Widget Settings

Widget Settings allow user to customize the functionality of the **Interactive Widget**. Users can specify which content should appear in the **Interactive Widget** within the **Widget Settings**.

Grid Widget Settings

Enter the following information to populate a **Grid Widget** on the **Dashboard**:

Field	Description
Label	Widget Name. This is an optional field.
Icon	Widget Icon. This is an optional field.
Width & Height	Width and Height of the Widget. This is an optional field.
ItemType	Widget ItemType. This is a required field.
Search	Widget Favorite Search. This is an optional field.
Results per Page	Number of rows to be displayed per page in the grid. This is an optional field.
Maximum Results	Maximum number of items to be populate the widget grid (across all pages). This is an optional field.

Search Criteria

Important

The fields shown may vary depending on the configuration.

Report Widget Settings

Enter the following information to populate a **Report Widget** on the **Dashboard**:

Field	Description
Label	Widget Name. This is an optional field.
Icon	Widget Icon. This is an optional field.
Width & Height	Width and Height of the Widget. This is an optional field. Enable dynamic context selection. Allow the widget's content to be updated from other widgets in the same Dashboard
Report	Display Widget Report. This is a required field.
ItemType	Widget ItemType. This is a required field.

Important

The fields shown may vary depending on the configuration.

Tree Grid Widget Settings

Enter the following information to populate a **Tree Grid Widget** on the **Dashboard**:

Field	Description
Label	Widget Name. This is an optional field.
Icon	Widget Icon. This is an optional field.
Width & Height	Width and Height of the Widget. This is an optional field. Enable dynamic context selection. Allow the widget's content to be updated from other widgets in the same Dashboard
Tree Grid View	Display Tree Grid View Definition. This is a required field.
Context Item	Root item of the Tree Grid View. This is a required field.

Important

NOTE: The fields shown may vary depending on the configuration.

Delete Interactive Widget

The following steps outline the process to delete an **Interactive Widget**:

1. Open a **Dashboard**.
2. Click **Edit**.
3. Select the Widget and click **Delete**.

The **Delete Widget** dialog box appears.

4. Click **Delete**.
5. Click **Done** to save the changes.

Create New Widget Template

The following steps outline the process of creating a new **Widgets Template** using pre-existing **Widget Templates**:

1. From the **Table of Contents**, expand **Administration** and **Configuration**.

1. Select **Widget Template**. The **Widget Template Table of Contents** appears.
2. Click **Search Widget Templates**.

3. Click **Search**. A list of **Widget Templates** appears.
