

Single Page

The template created in Aras ProAppDesigner can be single page or multi page. If the template has only one page, then it is called a single page application. In case of single page wizard, item keyed-name is used to show the page title.

The screenshot displays the Aras Innovator web application interface. The top navigation bar includes the 'aras INNOVATOR' logo, a search bar, and several tabs: 'Suppliers', '34564 BOSCH', and 'Mathews Long'. The main content area is titled 'Mathews Long' and contains two panels: 'Basic' and 'Details'. The 'Basic' panel includes fields for 'First Name' (Mathews), 'Last Name' (Long), 'Email Address' (m.lg@bosch.com), and 'Phone Number' (+1 198-323-9132). The 'Details' panel includes fields for 'Created By' (Innovator Admin), 'Created On' (7/24/2024 5:34:40 AM), 'Modified By' (Innovator Admin), and 'Modified On' (7/24/2024 5:34:40 AM). The interface is clean and professional, with a blue header and a white background for the form fields.
