

Installing Streaming 3D Viewer During Upgrade

Important

Please note that the output files of Dynamic/Monolithic Viewer and Streaming Viewer are incompatible with one another.

If the Streaming 3D Viewer is installed in an environment where the Monolithic or Dynamic 3D Viewers have been previously installed and used, all existing native files of existing CAD Documents need to be re-converted. There is no automated means to perform this reconversion.

Important

Only one Streaming Viewer can be installed on one machine at a time.

Important

The Streaming Viewer currently cannot be deployed in a cloud environment.

The HOOPS Server must be deployed with networked file access to a single vault containing view files for rendering.
