

Enabling an ItemType for Secure Social

When an ItemType is enabled for Secure Social Messaging, the tear-off window for that item will include a colored sidebar on the left side of the window plus a Discussion Panel that provides the Visual Collaboration (VC) functionality.

A detailed description of the Visual Collaboration User Interface is described in the Online Help section of **Just Ask Innovator**.

Not all ItemTypes are enabled by default. They can be enabled only by an administrator.

To enable social content for an ItemType, do the following:

1. Login to Aras Innovator as an administrator.
2. Go to **Contents --> Administration --> ItemTypes**.
3. Create a **New ItemType** or open an existing ItemType, for example, **Manufacturer Part** ItemType from the search grid for edit.

- A new **Enable for Secure Social** button is seen on the right side of the window.
- Click this button to enable the **Manufacturer Part** ItemType for secure social content.

Important

For the **Is Relationship** ItemTypes, enabling for Secure Social is not possible.

The ItemType is now enabled for secure social.

- Select the **Secure Social** tab.

DiscussionTemplate

Hidden

Class path	File Selection...	Item Selection...	Default Visibi...
-1	-1	-1	

A single **DiscussionTemplate** with the following default properties has already been added in the relationship grid.

- **Class path:** Root
- **File Selection Depth:** -1
- **Item Selection:** -1

Important

It is not possible to save the **Enabled for Secure Social** ItemType without setting the **DiscussionTemplate** for **Root** Class path.

Click Save and Done to close the window.

For more information on the administrator configurations to the **DiscussionTemplate**, refer to Aggregation of Secure Messages Discussion Template in the next section.
