

Connecting LDE to SDE

When working in the LDE, open Windows PowerShell as an administrator to connect to SDE.

The following steps outline the process for connecting to an SDE:

1. Run Windows PowerShell as an administrator.

2. Run the command: **az login**

If tenant-level access is missing, run the command:

az login --allow-no-subscriptions

The Microsoft Azure dialogue box appears.

3. Select the Microsoft Azure account to launch Azure. The following message should appear:

Using **az login** might not consistently grant access to the specific SDE. If the **az login** does not work, using the **Personal Access Token (PAT)** method is recommended.

The current **Baseline** can be obtained and stored with the LDE successfully linked to the SDE.
