

Out of the Box Setup

When Aras 3D Visualization is installed, the following OOTB setup is used in the **ConversionServerConfig.xml** file:

```
<AssemblyCommand dynamicEnabled="True" arguments="--  
sc compute bounding boxes 'All' --input pdf template file 'C:\HOOPS  
Converter\templates\Blank Template L.pdf' --output pdf  
'%filepath%\%filename%.pdf' --output png '%filepath%\%filename%.png' --  
output png resolution '150x150' --output scs '%filepath%\%filename%.scs' -  
-output xml assemblytree '%filepath%\%filename%.xml' --output prc  
'%filepath%\%filename%.prc' --background color '1.0, 1.0, 1.0' --  
output_logfile '%filepath%\%filename%.log'" />
```

Important

Due to differences between the Windows and Linux file systems, it is required to use OS-specific path separators in paths. Because the Linux file system is case-sensitive, there is a significant difference between these file names: **./path/to/file.xml** and **./path/to/File.xml**. For more information about cross-platform development, refer to the Cross-platform development section in the Aras Innovator 31 - Programmer's Guide.
