

Installing Chocolatey using Windows PowerShell

The following steps outline the process to install the Chocolatey tool using Windows PowerShell:

1. Open Windows PowerShell and run as Administrator.

With PowerShell, please ensure that **Get-ExecutionPolicy** is not **Restricted**. Using **Bypass** is recommended to bypass the policy to get things installed, or **AllSigned** for more security.

Run **Get-ExecutionPolicy**. If it returns **Restricted**, then run **Set-ExecutionPolicy AllSigned** or **Set-ExecutionPolicy Bypass -Scope Process**.

2. Copy the following command and paste into PowerShell:

```
Set-ExecutionPolicy Bypass -Scope Process -Force; [System.Net.ServicePointManager]::SecurityProtocol = [System.Net.ServicePointManager]::SecurityProtocol -bor 3072; iex ((New-Object System.Net.WebClient).DownloadString('https://community.chocolatey.org/install.ps1'))
```

3. Wait a few seconds for the command to complete.
4. For more information, please visit <https://chocolatey.org/install>.
