

SAML2 Authentication Plugin Configuration

The Aras Innovator login may be customized using the SAML 2.0 Authentication Plugin described in this section. This plugin provides a way to use external identity providers by the SAML 2.0 protocol for Aras Innovator. The customization requires changes in the OAuth server configuration to enable the SAML 2.0 authentication plugin.

Changes in the configuration should be made using a transformation mechanism. For more information about full flow, refer to the [Example: Setup of Aras Innovator SAML 2.0 Authentication with Azure as Identity Provider](#) section.
