

Release Notes

Enhancements in Aras Package Import-Export Utilities 15.0.2

.NET 10 Compatibility

The Import/Export Tool has been updated and adapted to fully support .NET 10. This includes ensuring successful builds, runtime compatibility, and stable operation within the .NET 10 environment.

Improved Aras DevOps Support

Efficiency has been improved for both SaaS and MSI installations by reducing database load caused by rebuilding secure functions and applying structural changes.

Additional Stability and Quality Improvements

These changes improve the overall robustness and reliability of the Import/Export Tool.

Fixed Issues in Aras Package Import Export Utilities

Issue #	Description
IH-7266	Case sensitivity issues in AML package paths on Linux no longer cause failures. When running Console Upgrade on Linux, AML package paths now correctly handle case sensitivity (e.g., lowercase paths with uppercase folders), aligning behavior with Windows.
