

OnSubmit Event

The OnSubmit event is triggered after the Submit button is clicked within a flyout. This event is supported exclusively for flyout.

// accessing form values in the flyout & saving them

```
let price = appStudioWizard.getControlValue("price");  
let date = appStudioWizard.getControlValue("purchased on");  
let managedBy = appStudioWizard.getControlValue("managed_by_id");
```

*// calling a server method to save the data. Refer to **2.7 Examples** on how to call server method.*

```
if (onSuccess) {  
    appStudioWizard.showSuccessMessage("Item saved successfully");  
} else {  
    appStudioWizard.showErrorMessage("Failed to save the Item.");  
}
```
