

Fixed Issues in ProAppDesigner

Issue #	Description
309	When the Tree Table height is set to Fit to content , the section does not return to its original size after you maximize it and then restore it.
314	Font settings are not applied to the checkbox control.
984	Document Control: The data does not refresh when you click the Refresh button.
1048	When the file control is set to Video and you start recording, the system does not show an alert—such as “ Camera not found ”—if no camera is available.
1251	Reload Wizard: The Reload Wizard API does not work for newly created items in Enhanced View.
1522	The Refresh button does not work in the actual Item view.
1603	Worksheet: Move the property filter so it appears below the nested columns.
1609	Graph Control: After claim/unclaim, you cannot tell which node is claimed and which is not.
1656	Commands: When Hide Command Button is selected, the Card Command/Context Menu checkbox should automatically clear.
1666	When you set the height to Auto in a Table, Worksheet, or Tree Table, an unnecessary scrollbar appears.
1678	A continuous loading icon appears when you click any icon in the Template View Settings.
1697	Graph Control – Table Column Settings: When you set a property to Read-only , the field is still editable in the actual item.
1703	Portal accessibility issues.
1704	Global Theme: When the default portal logo is displayed, the action buttons are partially hidden.
1729	Graph Control: After claim/unclaim, you cannot tell which node is claimed (duplicate issue).
1731	Worksheet – Nested Column Flyout: Edited row values reappear after canceling, and clicking Cancel again applies them to the worksheet.

1740	In Graph Control, expand/collapse icons are not visible at the second level before saving the graph.
1744	Claim/Unclaim icons in App Studio do not match Innovator.
1756	The table is not visible in the Structure & Versions flyout.
1762	The ItemType ID appears instead of the name when inserting data into a table control.
1776	Tree Table does not retain its state.
1765	In non-edit mode, hovering over text in empty pages/panels/flyouts changes the cursor to a hand pointer instead of an arrow.
1780	Default row selection does not work in dashboard tables.
1781	Collection Controls: The Show header option does not work.
1785	Graph Control: Claim/Unclaim behavior does not match Innovator.
1788	Structure and Graph Control: Boolean values display true but not false in tree nodes.
1789	OnBeforeSave: Add help text for the OnBeforeSave event to the Help Text flyout.
