

# Prerequisites

To install ProAppDesigner, **users need to confirm** that the installation of Aras Innovator meets the minimum requirements to run ProAppDesigner.

**Check the eligibility** of code tree and database:

From the **TOC**, select **Administration, Variables**.

VersionMajor	VersionMinor	VersionServiceUpdate
14	0	27
14	0	28
14	0	29
14	0	30
14	0	31

If it does not meet the service pack requirements listed in the previous steps, contact Aras to discuss options.

Make sure to have the **following versions** installed:

- Aras Update Tool **1.17+**  
or
- Aras Innovator **Package Import Export Utilities**
