

Changes pending flag behavior

Known behavior: changes pending flag

The `has_change_pending` flag is a legacy indicator from PE Change Management that shows when an item is part of an active change process.

In Unified Change Management

- The flag remains for compatibility but is not used by UCM.
- When a Change Order is promoted to In Work, the flag is set on all affected items but may be cleared during versioning.
- This behavior is expected and does not affect UCM.
- Use the Changes tab of the Part, CAD, or Document to track active changes instead of relying on the flag.

Important

If you need to check whether an item is part of an active change, open the **Changes** tab. It shows all UCM and PE Change Items that currently affect the item (image below).

Part

Part Number	Revision	State	Assigned Creator
P-001-New	B	Released	Innovator.Admin
Name			Designated User
Test Part 01			Innovator.Admin
Type	Unit	Make / Buy	Cost
	EA	Make	
Effective Date			12/9/2025 1:11:59 PM
Long Description			
<input type="text"/>			
<input checked="" type="checkbox"/> Changes Pending		Control Type	
		<input type="text"/>
