Solution

Confirm that the Conversion Server URL is correct in Aras Innovator.

This URL depends on where the Conversion Server was installed on the website with the Aras Innovator installer. For example, the default URL is the following:

- When the Conversion Server was installed with the Aras Innovator instance: <http://serverName/InnovatorServer/ConversionServer/ConversionService.asmx>
- When only the Conversion Server was installed: <http://serverName/ConversionServer/ConversionService.asmx>

where, serverName is the Aras Innovator domain name.
