

Aras 3D Visualization Download

The Aras 3D Visualization 35 platform component is delivered as the **Aras 3D Visualization 35 CD Image** package, which subscribers can download from the [Aras File Sharing](#) site. The site content and folder structure are specific for a given logged-in user. The downloaded package may be a zip archive that should be extracted. The unzipped package should be copied to a machine where an Aras 3D Visualization component is going to be upgraded.
