

Splash Screen

The following steps outline the process to change the Aras Innovator splash screen:

1. Select a background Image and obtain the customer's logo to be applied to the splash screen.

Important

Contributors need a tool to manipulate SVG images. Use any required tool.

2. In the following directory, add the Background image and Customer logo obtained from step 1:

```
C:\{working directory}\Instances\dev\OAuthServer\wwwroot\images
```

3. From C:\{working directory}\TransformationsOfConfigFiles\ directory, modify the OAuthServer.config file. Notice the location of the file to edit. It is important to do this in the **Transforms** folder, as shown in the screenshot below:

```

1 <?xml version="1.0" encoding="utf-8"?>
2 <configuration xmlns:xdt="http://schemas.microsoft.com/XML-Document-Transform">
3
4   <oauth configSource="OAuth.config"></oauth>
5
6   <configuration>
7     <section name="path" type="Aras.OAuth.Configuration.OAuthSection, Aras.OAuth.Configuration"></section>
8     <sectionGroup name="Aras">
9       <sectionGroup name="Web">
10        <section name="RequestProvider" type="
11          Aras.Web.Configuration.RequestProviderConfigurationSection, Aras.Web"></section>
12      </sectionGroup>
13    </configuration>
14    <authentication>
15      <add key="InnovatorServerUrl" value="{ADT_INNOVATOR_URL}/server/innovatorserver.aspx" xdt:Transform="Replace"></add>
16      <!--
17      'AuthenticationAdmin' is a name of user to access InnovatorServer.
18      -->
19      <add key="AuthenticationAdmin" value="authadmin"></add>
20      <!--
21      UI Customization
22      -->
23      <add key="ProductName" value="Aras Innovator"></add>
24      <add key="CustomAuthenticationLoginPage" value="Aras_Innovator"></add>
25      <add key="LoginUrl" value="/images/ArasInnovator.png"></add>
26      <add key="BackgroundImageId" value="/images/loginbackground.jpg"></add>
27
28    </authentication>
29  </Aras>
30 </configuration>
31 </add>
32 <add key="LoginUrl" value="{ADT_INNOVATOR_INSTALLATIONPATH}/OAuthServer/wwwroot/images/customized.png.svg" xdt:Transform="Replace"></add>
33 <add key="BackgroundImageId" value="{ADT_OAUTH_INSTALLATIONPATH}/images/customerLoginBackground.jpg" xdt:Transform="Replace"></add>

```

Important

It is best to use the OAuth installation path, ADT_OAUTH_INSTALLATIONPATH, directly as it may be installed differently.

4. Stage the changes before running the Build scripts.
5. Run the **./BuildAndDeploy.ps1** script to rebuild Aras Innovator.
6. Notice the changes to the login screen.
