

List Control

setListOptions

Set list options for a List control by its control name.

```
const options = { optionValue: "OptionLabel", optionValue2:
"OptionLabel2" };
appStudioWizard.setListOptions(listControlName, options);
```

setCollectionListOptions

Collection controls can have column that represents a list. Table, Worksheet, TreeTable, DashboardTable, DashboardWorksheet can have a column of type list. Following API sets list options for a collection control by passing its list column name.

```
const options = {optionValue: "OptionLabel", optionValue2:
"OptionLabel2"};
appStudioWizard.setCollectionListOptions(collectionControlName,
columnName, options);
```

setCollectionChildListOptions

Set list options for nested table for a collection control by passing its list column name and relationship name.

```
const options = {optionValue: "OptionLabel", optionValue2:
"OptionLabel2"};
appStudioWizard.setCollectionChildListOptions(collectionControlName,
relationshipName, columnName, options);
```
