

# Include Config Transformation

1. Add a Configuration transformation file for the *method-config.xml* in the *..\TransformationsOfConfigFiles\Innovator\Server* folder of the *MethodConfig* repository with the following content:

```
<MethodConfig xmlns:xdt=" http://schemas.microsoft.com/XML-Document-Transform</a>
  <ReferencedAssemblies>
    <xdt:Transform="Insert">$(binpath)/applications/ucm/Aras.UnifiedChangeManagement.Abstractions.dll</xdt:Transform>
  </ReferencedAssemblies>
</MethodConfig>
```
