

Confirming Aras 3DV Installation

The following steps outline the process of confirming the successful installation of given Aras 3D Visualization components:

1. Log into Aras Innovator as an administrator.
2. From the **Table of Contents**, expand **Administration** and select **Variables**.
3. Confirm that Variables for the given components are listed with necessary Values:
 - o 3D Visualization.3DViewers: 14.9.0
 - o 3D Visualization.CadConverter: 14.9.0
 - o 3D Visualization.DPN: 14.9.0
 - o 3D Visualization.restoreCamera: true

The screenshot shows the 'Variables' configuration page in Aras Innovator. The page has a search bar and several filter buttons (Clear, Simple, Default, Refine, Display, Share, New Variable). Below the search bar is a table with the following data:

Name ↑	Value	Default Value
3D Visualization.3DViewers	14.9.0	
3D Visualization.CadConve...	14.9.0	
3D Visualization.DPN	14.9.0	
3D Visualization.RestoreC...	true	true

If there is no Variable with the correct Value for a component, the installation of this component fails. Restore the Aras Innovator code tree, Conversion Server, and database with the backups done before the installation and contact Aras Support at support@aras.com .
