Prerequisites

To apply Hotfix-076394.25 to Aras Innovator, confirm that the software is currently eligible for this hotfix. Next, download the necessary materials for the upgrade.

Checking for Eligibility

Important

The Microsoft ASP.NET Core / .NET Runtime and Hosting Bundle for .NET 10 must be installed on each server machine that is running Aras Innovator systems.

The following steps outline the process to check if Aras Innovator is eligible to apply Hotfix-076394.25.

1. Log in to Aras Innovator as an administrator.
2. From the **Help** menu, select **About**.
3. Confirm that the window shows the following MSBuild Number: 000000.00.
4. Navigate to **Administration\Variables** in the Table of Contents.
5. Confirm that the following set of variables is listed:

Variable Name	Variable Value
VersionMajor	14
VersionMinor	0
VersionServiceUpdate	25
MSBuildNumber	000000.00

If eligibility requirements aren't met, contact Aras Support before installing.

Required Tools and Materials

If the Prerequisites listed in the previous section have been met, the next step is to obtain the required upgrade files and utilities.

Aras Update Tool

The **Aras Update** tool can be downloaded from https://www.aras.com/support/downloads .
Aras Update should be downloaded and installed locally on every node running an Aras Innovator

component.

Hotfix Patch

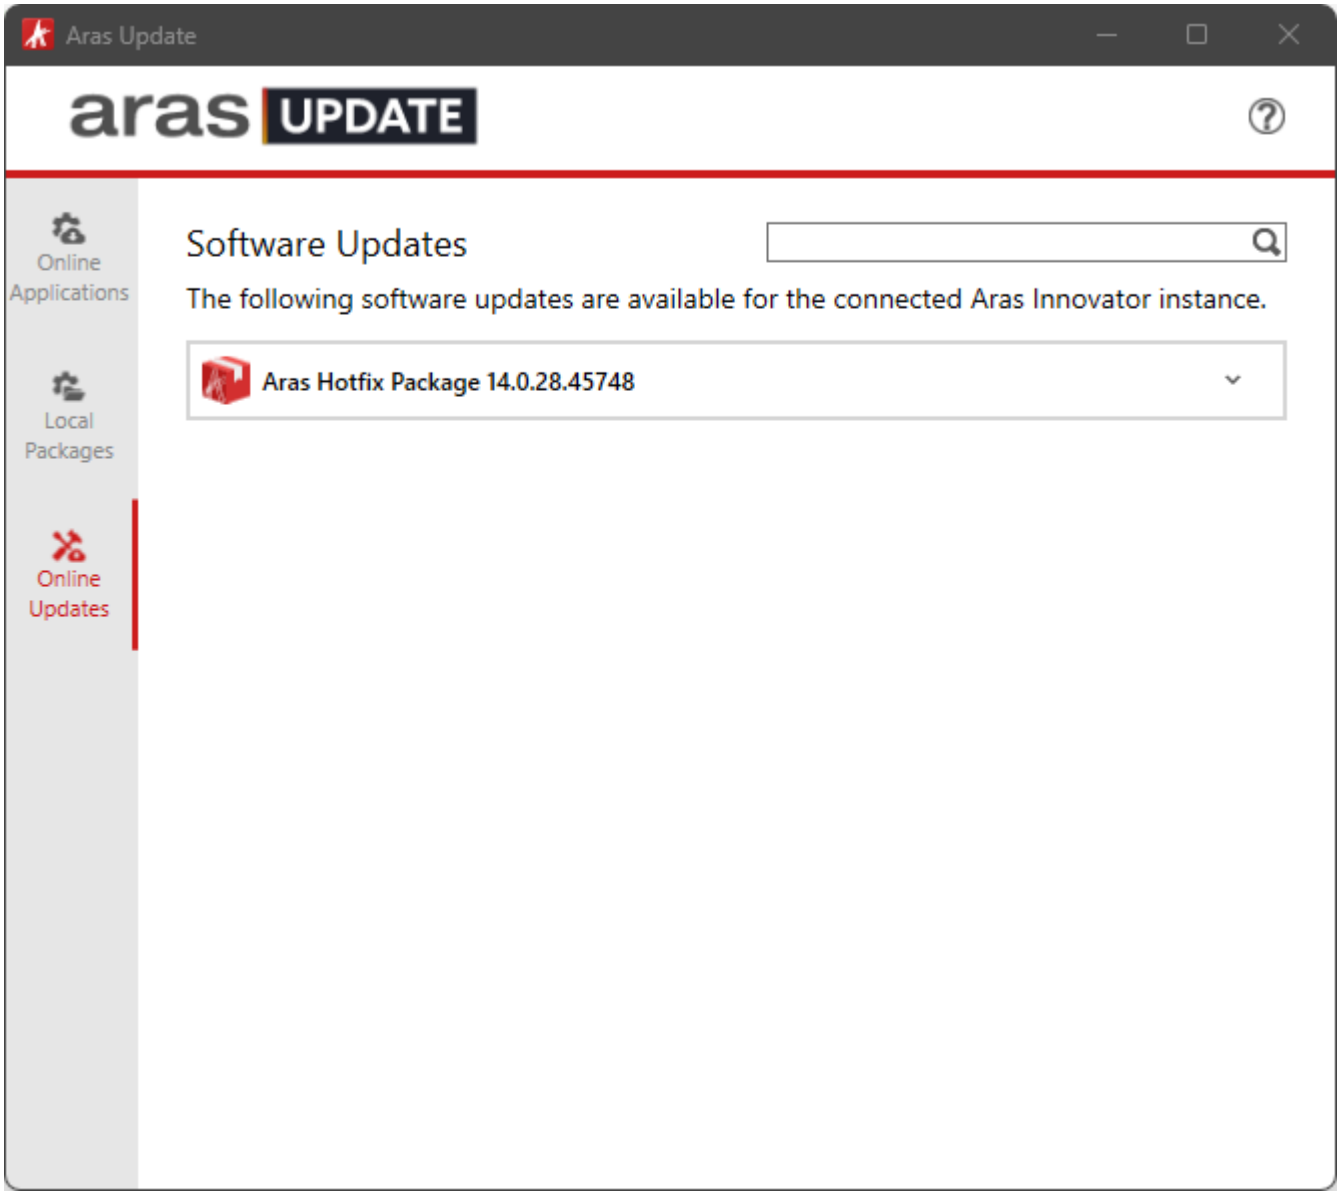

Hotfix-076394.25 is distributed through the Online Updates feature in Aras Update. Manual download is no longer required.

In Aras Update, select the **Online Updates** tab. Enter the **Innovator Url**, **Database**, **Innovator login**, and **Innovator password** for the instance to be updated, then click **Get Packages**:

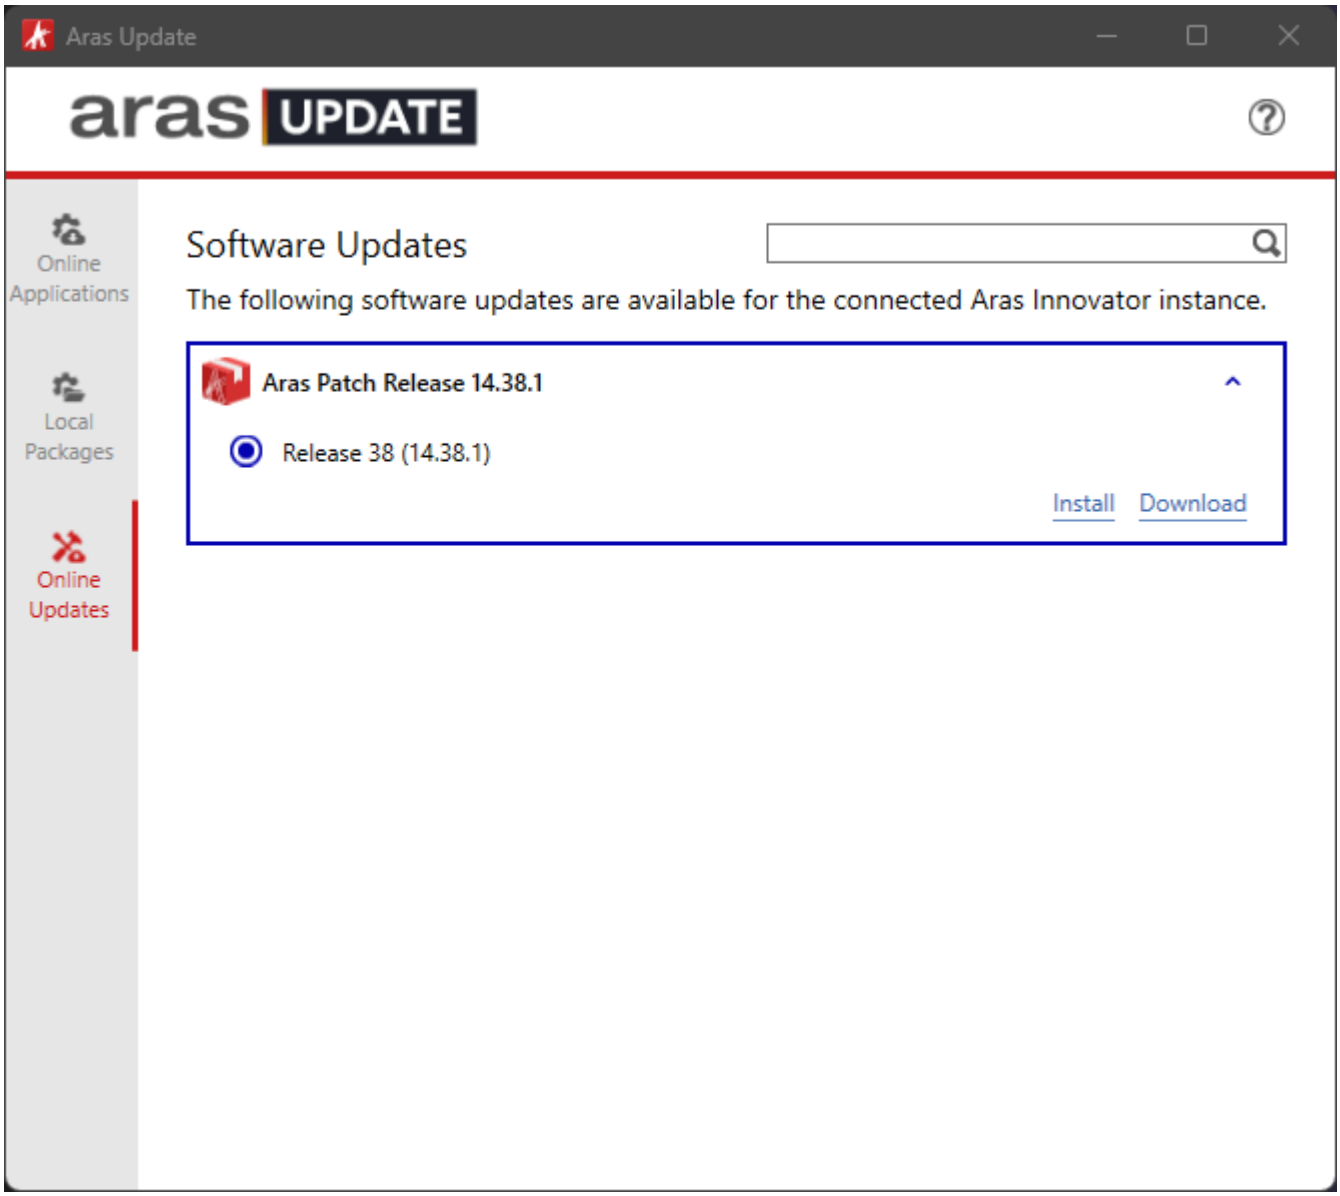

©2026 Aras Corporation All Copyrights Reserved

Aras Update contacts the Aras subscriber service and lists the software updates available for that instance:

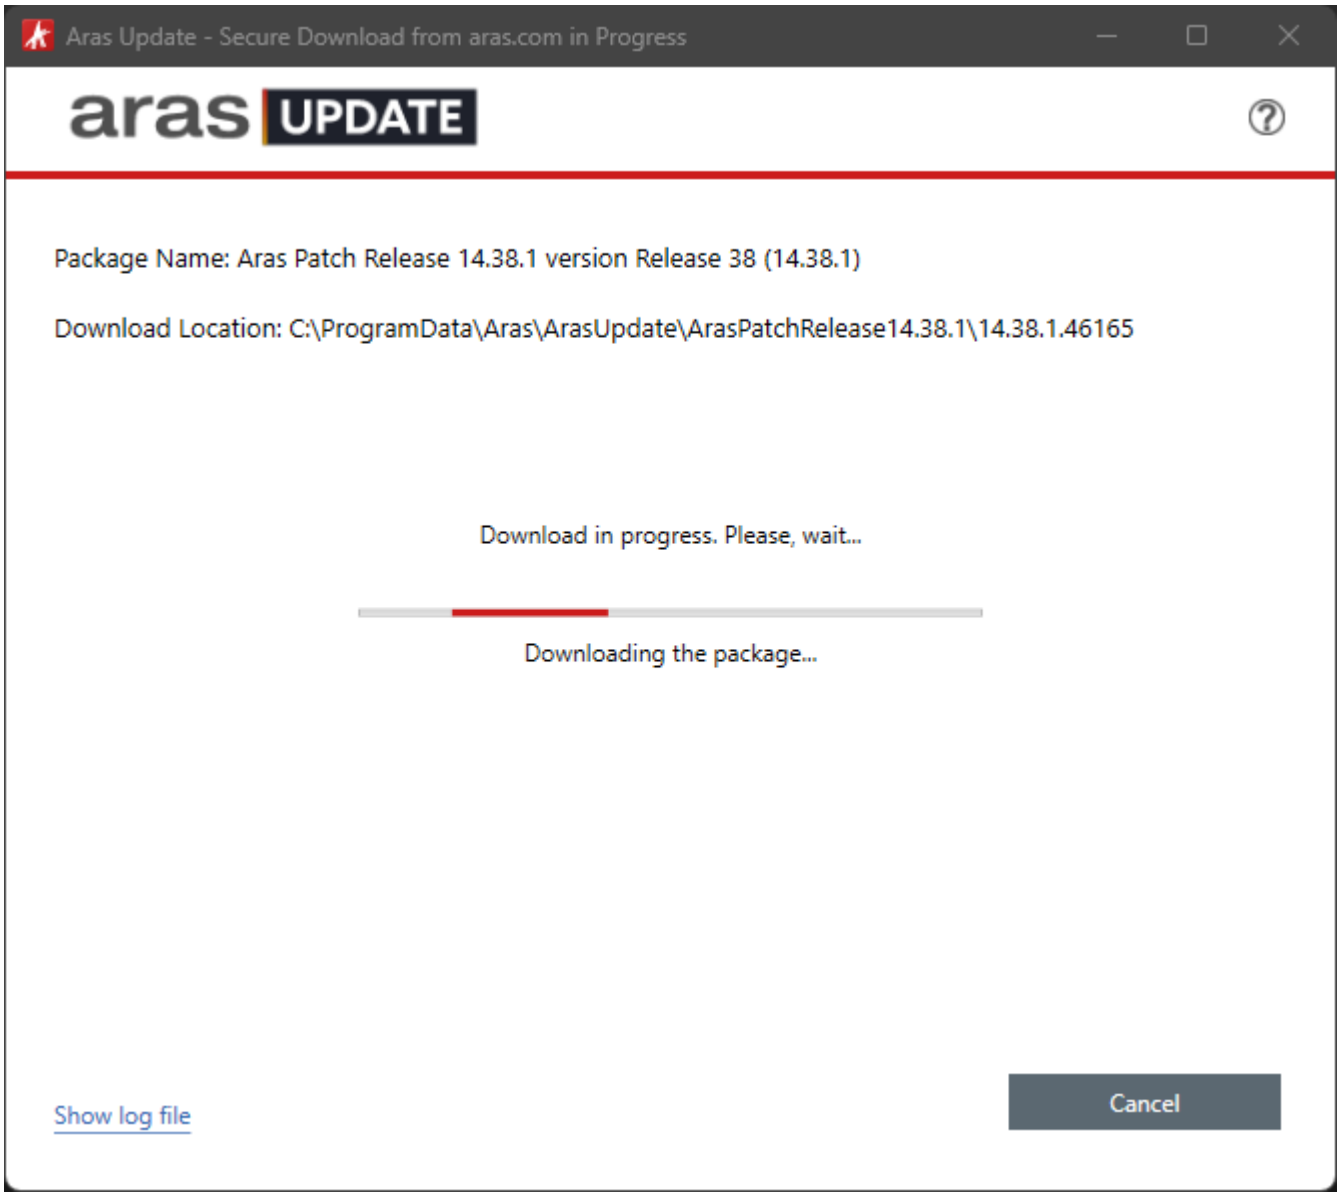

Click the listed patch release to expand it and show the specific release version, then click **Install** to download and install the package in one step, or click **Download** to obtain the package without installing it immediately:

Either action adds the package to the **Local Packages** tab in Aras Update, ready for the Automated Installation Option or the Manual Installation Option.

Checking for Additional Features

Aras Applications and Platform Components

If any Aras Applications or Platform Components are being used, contact Aras Corporation Support at [Aras Subscriber Portal] to confirm their compatibility with the .NET 10 update.
