

Overview

My InBasket, the destination for Workflow assignments, is now configurable, customizable, and searchable. The new features are:

- Search and filter InBasket: You can search and filter InBasket Items. All the search modes: Simple, Advanced, AML and Hide Search Criteria are now available for InBasket items.
- Saved Search: You can save searches that can be used to retrieve searches that have been created previously.
- Configuration (administrators only): You can add additional source items to the InBasket query, beyond the currently supported items (Workflow Activities Items).
- Customization (administrators only): You can customize the InBasket to add columns to the InBasket display, hide existing columns, re-label columns, and change column widths and order.

Important

Make sure that you do not use any of the InBasket tasks as related source id or data source or data property in the relationship grid.
